Interstate 15 in Corona Bridge/Paving Rehab Project

Corona – A project to coat the bridge decks with methacrylate on Interstate 15 (I-15) in Corona between Weirick/Dos Lagos and Temescal Canyon Road is on-going. The methacrylate is needed to protect the bridges and ensure longevity. The work on the bridges is complete, but there is still work to be done.

The project will now focus on placing a drainage line from Ontario Avenue to Weirick Road on the southbound side of I-15 only and grinding and paving all of the lanes in both directions.

The work will take place at night and the closures are as follows:
